

GAINA MARINE

Coastal Durability Meets Advanced Thermal Ceramic Technology.

THERMAL PROTECTION THAT DEFIES THE COASTLINE

GAINA Marine is a cutting-edge thermal ceramic paint, engineered to provide long-lasting protection in the harshest marine environments. Formulated to withstand UV radiation, saltwater corrosion, and extreme temperatures, it delivers advanced performance for a wide range of marine and coastal applications, including vessels, docks, hydraulic piping, offshore platforms, and infrastructure. This lightweight paint offers exceptional thermal insulation and anti-rust properties without adding unnecessary bulk or requiring intensive maintenance. Easy to apply and environmentally friendly, GAINA Marine reduces energy consumption in climate-controlled spaces, enhances surface durability, and helps extend the operational life of valuable marine assets.

WHY CHOOSE GAINA MARINE

Beyond its protective qualities, GAINA Marine enhances overall functionality by reducing interior heat buildup, dampening sound, and helping control odours, making it an ideal choice for both industrial and commercial marine operations. Its seamless application process ensures minimal disruption to ongoing operations while supporting long-term sustainability goals. Whether you're outfitting a ship deck, safeguarding coastal infrastructure, or improving vessel efficiency, GAINA Marine stands out as a future-ready solution that combines performance, energy savings, and environmental responsibility in one durable, high-tech coating.

APPLICATIONS

Ship Hulls & Decks

Engine Rooms & Cabins

Offshore Platforms & Oil Rigs

Containers

Offshore Platforms and Oil Rigs, Storage and Onboard Utility Areas, Yachts and Commercial Vessels, Lighthouses, Reefers and Cold Stores.
