

SOLARGUARD

Powering Sustainability, Enhancing Performance,
Protecting South Africa's Energy Future

WHY SOLARGUARD

SolarGuard Cleaners and Coatings enhance Solar Panel efficiency year round, delivering consistent performance in all conditions, sunny or cloudy. Its anti-reflective properties extend peak productivity throughout the day, ensuring higher linear energy output. SolarGuard's anti-static and anti-fouling properties, allow rain and wind to wash away and prevent build up of harsh and damaging contaminants, cutting maintenance time and expenses.

WHY CHOOSE SOLARGUARD COATING

SolarGuard offers a practical and cost-effective solution for older, near end-of-life solar panels, giving clients the flexibility to retrofit existing installations rather than immediately replacing them. Applying SolarGuard significantly extends the lifespan of Panels and enhances the efficiency of ageing panels, providing home owners and businesses with continued revenue generation from their solar assets, by improving panel performance and longevity and ensuring optimal peak productivity. 3 Year + Warrantee on Solar Panel performance when cleaned and coated with SolarGuard products.

 Advanced Anti-Reflective Hydrophilic Coating

 Enhanced Linear Performance

 Superior Panel Protection

 Environmentally Sustainable

 Easy - Cleaning Technology

 Retrofit Don't Replace, Revitalize Solar Ageing Assets
