

Introduction – HED Africa Second-Life Solar Panels

HED Africa is pleased to introduce our **Second-Life Solar Panel range**, designed to bring affordable, reliable, and sustainable energy solutions to Africa.

The panels are sourced directly from the UK and are **5–6 years old, various wattage**. Before being supplied, each panel undergoes a full **factory reset** process, restoring performance to its original power rating. To further enhance efficiency, every panel is cleaned and coated with our proprietary **SolarGuard hydrophilic coating**, which:

- Protects against contamination and dust
- Keeps panels cleaner for longer
- Reduces the frequency of cleaning and minimises water usage
- Extends performance and lifespan

Every HED Africa Second-Life Solar Panel comes with:

- A **3-year warranty**, including **free replacement** if the panel fails within the warranty period
- **Two drain clips** fitted to each panel to help dispel water and contamination
- A **specialised cleaning solution** for ongoing maintenance

Importantly, these panels are **guaranteed to sell below current new panel prices**, offering significant savings without compromising reliability

Delivery to all provinces can be arranged. Now with a presence in Zambia .

By choosing HED Africa's Second-Life Solar Panels, you not only benefit from lower costs but also contribute to sustainability re-using proven technology, reducing waste, and enabling wider energy access.
